Suresh IT's Coaching Training Center offers an extensive AWS Training program designed to provide participants with comprehensive expertise in Amazon Web Services (AWS) cloud computing technologies. This course covers a wide range of AWS services, including computing, storage, networking, security, and databases, enabling students to build, deploy, and manage scalable and reliable cloud-based solutions. By mastering AWS, graduates are prepared to pursue diverse roles in cloud computing and contribute to the success of organisations utilising AWS cloud infrastructure.

**Course Duration** : 2 Months

**Course Language** : English/Hindi/Telugu

**Classroom** : Offline/Online Training/Hybrid Training

## Description

The AWS Training course is a comprehensive program designed to equip individuals with the knowledge and skills needed to effectively utilise Amazon Web Services (AWS), the leading cloud computing platform. Geared towards IT professionals, developers, and solution architects, this course offers hands-on training in AWS services, solutions, and best practices.

Throughout the course, participants will explore various aspects of AWS, including compute, storage, database, networking, security, and management tools. They will learn how to provision and manage AWS resources, design scalable and resilient architectures, and optimise performance and cost efficiency in the cloud.

Moreover, the AWS Training course covers essential topics such as AWS identity and access management (IAM), virtual private cloud (VPC), AWS Lambda, Amazon S3, Amazon EC2, and Amazon RDS, enabling participants to build and deploy a wide range of applications and services on the AWS platform.

By the end of the course, participants will be proficient in using AWS to design, deploy, and manage cloud-based solutions, empowering them to innovate faster, scale efficiently, and drive business growth in today's digital era. With their newfound expertise in AWS, participants will be well-equipped to pursue career opportunities in cloud computing and make a meaningful impact in their organisations' cloud transformation journey.
